

Digital Safety Checklist

1. **Verify the Sender:** Always double-check the actual email address of the sender; attackers often use addresses that are slightly altered to look legitimate.
2. **Pause Before Clicking:** Never click on links in "urgent" or "short-notice" messages without manually visiting the official website of the organization first.
3. **Protect Your Credentials:** Legitimate companies and internship programs will never ask for your email login credentials or passwords for "verification".
4. **Secure Your Accounts:** Enable Two-Factor Authentication (2FA) and change your passwords immediately if you notice suspicious login alerts or unusual activity.
5. **UPI: PIN is for Sending Only:** Remember that you only need to enter your UPI PIN to **send** money or check your balance, never to **receive** money from someone else.
6. **UPI: Verify the Payee Name:** Before hitting 'Pay' on any UPI app, always double-check the name displayed after scanning a QR code or entering a VPA to ensure it matches the intended recipient.
7. **Be Skeptical of "Urgency":** If a message threatens the "cancellation of selection" or demands action within a few hours, it is likely a psychological trap designed to bypass your judgment.
8. **Report Cybercrime Immediately:** If you fall victim to a scam or notice unauthorized transactions, call the **National Cyber Crime Helpline at 1930** or report it at **cybercrime.gov.in** immediately.
